

DE LA SALLE-COLLEGE OF SAINT BENILDE

Dear Benildean Community,

Greetings!

The College will organize a Trap-Neuter-Vaccinate-Release (TNVR) service for the stray or feral cats found on our campuses starting April 21. This initiative is in line with the recent "Guidelines on Stray Cats on Campus" and aims to provide a safe and humane approach to managing the population of stray cats, while also promoting kindness towards animals. We are confident that this initiative will be a success and help us make a positive impact on our community.

Please find below the list of recommendations for dealing with stray cats on campus.

General Guidelines	Approved Regulation	Preventive Action
Petting and handling of feral or stray cats.	Prohibited	Walk away to prevent harm or injury.
Trapping or doing any act that may hurt the stray cat	Prohibited	Report to the Center for Built Environment and Logistics (CBEL) any stray and feral cats that have intruded into campus facilities and buildings and may cause nuisance, injury, or harm. This will be addressed professionally using the TNVR services.
Feeding of Stray Cats	Prohibited	Donate cat foods to the Center for Built Environment and Logistics (CBEL) who handles the feeding of stray cats regularly.
Relocating Stray Cats	Prohibited	Leave the cats where you found them. Stray animals are territorial, and removal of such animals from their established territory may attract or invite other strays to occupy the space left.

DE LA SALLE-COLLEGE OF SAINT BENILDE

We appreciate your support for the TNVR service and cooperation in adhering to the general guidelines in dealing with stray cats on campus.

For inquiries about cat food donations, please visit the Center for Built Environment and Logistics at Greenway Square on the Taft campus or call local 3895/1192.

In Saints La Salle and Benilde,

(sgd) Mitchelle S. Osa
Built Environment Coordinator
